SUMMARY

Electrical Engineering graduate (FCRIT, 2026) with 3+ years of experience engineering production-grade web platforms and power electronics. Architected LLM-driven automation pipelines processing 1,000+ listings daily and optimized frontend systems at Sumati.io, slashing page load times by 45%. Expertise in bridging high-performance software with industrial hardware constraints.

EDUCATION

Fr. C. Rodrigues Institute of Technology (FCRIT) — Navi Mumbai, India

Bachelor of Engineering (B.E.) — Electrical Engineering 2022 – 2026 | University of Mumbai

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Bash, MATLAB, C, C++

Frontend: React, Next.js, Tailwind CSS, D3.js, WebSocket, HTML5, CSS3

Backend: FastAPI, Flask, Node.js, .NET Core, REST APIs, JWT, Async I/O, Microservices

ML / AI: PyTorch, XGBoost, SHAP, scikit-learn, LLM Integration, Claude API, Anomaly Detection

Data / Scraping: Scrapy, Playwright, Selenium, BeautifulSoup, pandas, NumPy, ETL Pipelines

Infrastructure: PostgreSQL, MongoDB, Redis, Docker, Linux, Git, AWS (EC2/S3/RDS), Vercel, CI/CD

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Freelance Mumbai, India | 2023 – Present

- Engineered and shipped 6 production web platforms (E-commerce, SaaS, Portals); maintained 100% uptime and served live user traffic
- Architected D3.js developer hub with 500+ entries; automated updates via Scrapy ETL pipeline, eliminating manual data entry
- Integrated subscription billing and session security across 3 client projects; achieved zero post-launch security incidents
Live: axiomdesignstudio.vercel.app · mitali-io.vercel.app · ath-framework.vercel.app · pustakalayxo.vercel.app · strokesdesigns.netlify.app · kofi-cart.vercel.app · aakankshaxtayade.vercel.app/login

Software Engineering Intern — Sumati.io Remote | Jan 2024 – Mar 2024

- Rebuilt policy module UI in React.js with component-level code splitting; measured 45% reduction in page load time
- Added .NET Core API response caching; cut redundant backend calls by ~60% on peak-traffic policy endpoints
- Built real-time observability dashboard tracking request latency, error rates, and service health across 4 microservices

Engineering Intern — Maharashtra State Electricity Board (MSEB) Navi Mumbai | Dec 2024 – Jan 2025

- Documented AI-SCADA integration use cases for automated fault detection across HT/LT distribution networks
- Observed transformer maintenance workflows, load-balancing protocols, and substation coordination across the Navi Mumbai grid

TECHNICAL PROJECTS

MSME Credit Intelligence Platform · FastAPI · XGBoost · SHAP · Claude API · AWS [\[Fintech\]](#)

- Built fintech platform that scores MSME creditworthiness using GST filings, credit bureau data, and bank statements — generates SHAP-explainable risk reports via Claude API
- Stack: FastAPI · XGBoost · SHAP · Claude API · PostgreSQL · Redis · React · AWS Mumbai
Live: vricred1.netlify.app

AI Job Aggregation & Lead Generation Pipeline · Python · Claude API · Scrapy · Docker [\[Automation\]](#)

- Built end-to-end pipeline scraping 50+ company job portals, scoring listing relevance with LLM inference, and generating personalized outreach drafts automatically
- Processes 1,000+ listings/day; 3-layer Redis deduplication; PostgreSQL lead lifecycle; Make/Zapier notification layer
- Stack: Scrapy · Playwright · Selenium · Claude API · Redis · PostgreSQL · Docker · APScheduler

Adaptive Web Scraping System · Python · Scrapy · PostgreSQL · Docker

- Built scraping engine handling static sites, SPAs, paginated APIs, and JS-rendered pages; proxy rotation + rate limiting for reliability
- PostgreSQL ETL produces clean, structured output; handles anti-bot headers and session rotation automatically
