in atharva-w-5565442a3

Profile

Full-stack engineer and AI systems builder with production experience from backend architecture and ML pipelines to responsive UI and cloud deployment. Fintech-oriented with hands-on exposure to NBFC credit infrastructure, MSME lending, adaptive scraping pipelines, LLM integration, and CI/CD-ready codebases.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, Bash, C, C++

Frontend: React, Next.js, Tailwind CSS, D3.js, React Flow, WebRTC, WebSockets, HTML5, CSS3

Backend: FastAPI, Flask, Node.js, .NET Core, REST APIs, JWT, Async I/O, Microservices

ML / AI: PyTorch, XGBoost, SHAP, scikit-learn, Anomaly Detection, LLM Integration, Claude API

Scraping / Data: Scrapy, Playwright, Selenium, BeautifulSoup, ETL Pipelines, pandas, NumPy

DB / Infra: PostgreSQL, MongoDB, Redis, SQL Server | Docker, AWS EC2, Linux, Git, Vercel, Make, Zapier

Professional Experience

Full-Stack Developer

Mumbai, India

Software Developer — Freelance

2023 – Present

- Architected and shipped 4 production web platforms:
 - Editorial portfolio for a workplace designer — aakankshatayade.vercel.app
 - Interior studio platform with video hero and filtered gallery — axiomdesigns.vercel.app
 - Gated branded portfolio with session management — strokesdesigns.netlify.app
 - D3.js-powered developer resource hub, 1,000+ entries — ath-framework.vercel.app

Sumati.io

Remote

Software Engineering Intern

Jan 2024 – Mar 2024

- Engineered full-stack policy modules in React.js and .NET Core, cutting page load times by **45%**; built real-time API observability dashboard with Serilog ingestion; implemented JWT auth and containerised stack on AWS EC2 via Docker

Maharashtra State Electricity Board (MSEB)

Vashi, Navi Mumbai

Engineering Intern

Dec 2024 – Jan 2025

- Monitored HT/LT distribution equipment data, analysing fault patterns and load management workflows

Education

Fr. C. Rodrigues Institute of Technology (FCRIT)

Vashi, India

B.E. Electrical Engineering

Nov 2022 – May 2026

Technical Projects

Demo: vri.cred

MSME Credit Intelligence Platform

- Async FastAPI engine: receives GST number → validates → checks Redis cache → fires bureau/GST/bank-statement API calls in parallel → XGBoost scorer → Claude API narrative report → saves → returns to lender. Full pipeline in **~90 seconds**. Bureau integration via Surepass, Karza, FinBox; SHAP explainability; RBI DPDP-compliant data handling
- Stack:** FastAPI, XGBoost, SHAP, Claude API, PostgreSQL, Redis, React, Docker, AWS Mumbai

Adaptive Web Scraping Pipeline

- Site-adaptive framework that fingerprints content type and dispatches the correct strategy: static HTML (Scrapy/BS4), JS-rendered SPAs (Playwright/Selenium), paginated APIs (direct endpoint), or hybrid multi-stage — with proxy rotation, rate limiting, and ETL to PostgreSQL
- Stack:** Python, Scrapy, BeautifulSoup, Playwright, Selenium, PostgreSQL, Docker

AI Job Lead Generation Automation

- End-to-end pipeline: scrapes job listings → Claude API scores relevance and drafts personalised outreach → Make + Zapier route qualified leads to CRM with follow-up scheduling; daily trigger with Redis deduplication
- Stack:** Python, Claude API, Make, Zapier, Scrapy, Redis, PostgreSQL

OSINT Intelligence Platform

- Automated aggregation from DNS, WHOIS, and public databases via Scrapy spider network with custom middleware; PyTorch classifier achieving **89% accuracy** across phishing, malware, and C2 threat categories
- Stack:** Python, Scrapy, PyTorch, PostgreSQL, FastAPI, React
